

BioActivator Complex Drops from BioSource Labs

The human body is made up of a few types of different fat. The first fat is called, structural fat, which cushions and protects the organs in the body. The body also has a fat called, normal fat, which is the padding on our body such as the padding on the feet and hands. Then the body has a fat called, abnormal fat, which is the excess fat on our bodies such as our love handles, spare tires, bellies, backs, and saddlebags.

When the hypothalamus is stimulated the body is able to release abnormal fat, which allows the body to rid itself of massive amounts of this type of fat very quickly.

The original rapid weight loss diet protocol, termed the “hCG diet” created by Dr. Simeon over 30 years ago outlines a very low calorie diet, in combination with injections of the hCG hormone which helps to stimulate the hypothalamus. Dr. Simeon’s research concluded that an abnormal operating hypothalamus is a leading cause of obesity. When the hypothalamus is not operating correctly, it causes the body to have intense food cravings, constant hunger, low metabolism, and a surplus storage of abnormal fat. When a person successfully

completes the hCG protocol diet plan the hypothalamus is able to reset and function properly.

However, HORMONE injections can be **dangerous** and are **NOT NECESSARY**.

In this program, you will be activating the hypothalamus WITHOUT use of hormones via a natural formula of ingredients in this BioActivator from BioSource Labs.

You will get the same amazing results without the side effects!

This is the Winning Combination! Utilizing the healing benefits of the BioActivator drops to stimulate and reset the hypothalamus, paired with a specific low calorie diet and vital nutrients to give your body everything it needs to be supported, detox safely and thrive during weight loss, is the winning combination!

People who have successfully completed the Metabolic Reset Program have reported experiencing the following benefits:

- Muscle: No Loss of Muscle Mass
- Fat Deposits: reduced overall (pot belly and double chins gone)
- Energy: increased without feeling nervous or jittery
- Thyroid Gland: normalized
- Overall Body: reshaped overall body

- Hormones: balanced out
- Sleep: improved restful sleep at night
- Adrenaline Glands: rebuilt
- Appetite: normalized
- Cholesterol: normalized levels
- Focus: clearer thought process
- Mood: less irritability, spirits lifted
- Anti-Aging: tightened skin, more youthful energy and appearance
