

What Is FLORASSIST GI Probiotic with Phage Technology?

Probiotics support digestive health and help maintain a balanced gut biome. This Best in Class probiotic formula also targets unwanted intestinal bacteria using a special TetraPhage blend.

FLORASSIST® GI is a blend of seven lactobacillus and Bifidobacterium strains, along with a bacteriophage blend to help target unwanted bacteria.

FLORASSIST® GI with Phage Technology Benefits

- Promotes digestive health and microbiome balance
- Features a novel bacteriophage blend to target unwanted bacteria
- Helps maintain optimal digestion & nutrient uptake
- Provides a blend of seven different probiotic strains with 15 billion colony forming units

Enlisting an Army of Healthy Gut Bacteria

What makes up the community of microorganisms in our digestive system? Bacteria, both healthy and otherwise—and our health depends on the good guys outnumbering the bad bacteria. But good bacteria are under siege from dietary and environmental influences, as well as other factors. Fortunately, promoting healthy bacteria in our digestive tract can have a positive impact on overall health and well-being.

FLORASSIST® GI was reformulated to do just that.

Product Details

FLORASSIST® GI with Phage Technology is our Best in Class probiotic formula. Probiotics promote digestive health and a healthy balance of bacteria in your intestines. Our formula also delivers an innovative bacteriophage blend that targets unwanted bacteria. We've combined both using advanced, dual-encapsulation technology.

Proprietary probiotic blend

All healthy individuals have billions of beneficial bacteria in the gastrointestinal tract that are essential for healthy digestion, nutrient absorption and elimination of waste.^{1,2} Probiotics are supplements and foods that contain specific strains of healthy

bacteria in adequate amounts to confer a health benefit. They support optimal digestive health, in part by helping to keep undesirable bacteria at bay.³

But that's not all. Properly formulated probiotics can offer health benefits for the entire body. They can positively modulate cell-signaling pathways and promote healthy immune and inflammatory responses.⁴⁻⁶

FLORASSIST® Balance delivers seven probiotic strains: *Bifidobacterium breve* Bbr8; *Lactobacillus plantarum* 14D; *B. animalis* ssp. *lactis* BLC1; *L. paracasei* IMC 502; *L. rhamnosus* IMC 501; *L. acidophilus* LA1; *B. longum* ssp. *longum* SP54. Per capsule, there is a total of 15 billion colony forming units (or CFUs) of the proprietary blend of these probiotic strains. Plus, the FLORASSIST® probiotic blend is formulated to work with the TetraPhage blend.⁷

TetraPhage blend

A bacteriophage is a tiny bundle of DNA or RNA that attaches to a specific strain of unwanted bacteria in the intestines—which is bad news for them!⁸ Our TetraPhage blend contains four bacteriophages that have been shown in a clinical study to target certain unfavorable strains of bacteria and encourage the growth of beneficial flora.⁹

The best probiotic formula we have to offer

This is our Best in Class probiotic formula. It offers an innovative approach to restoring a healthy microbiome, promoting digestive health and encouraging a healthy balance of gut bacteria.
